

MARVIN ESCALLE

IT BUSINESS ANALYST | FUNCTIONAL ANALYSIS & TECHNICAL COORDINATION

Paris, France | +33 6 01 77 41 27 | marvinescale.pro@gmail.com

PROFILE

Master's graduate in DevOps with three years of apprenticeship experience, including two years at Thales working on complex systems. Hybrid functional and technical profile with hands-on experience gathering and clarifying client requirements, facilitating stakeholder discussions, assessing feasibility, proposing solutions under technical and budget constraints, and supporting implementation, testing and validation.

PROFESSIONAL EXPERIENCE

IVVQ Engineer - Apprenticeship | Automation & Systems Integration, Business Analysis | Thales - Paris, France | Sep 2023 - Sep 2025

- Facilitated and participated in meetings with clients and stakeholders to gather, clarify and reformulate functional and technical requirements.
- Acted as a bridge between users/clients and technical teams by translating business needs into actionable technical requirements and supporting delivery through implementation.
- Assessed feasibility and proposed solutions or alternatives while considering technical, security, timeline and budget constraints.
- Supported solution follow-up, systems integration, verification, validation and testing activities on complex systems in a defense environment.
- Automated the collection, structuring and transfer of technical data using Python and Ansible, preparing data for downstream analysis and reporting.
- Administered project Active Directory accounts, groups and access rights, and integrated hardware equipment into secure Cisco environments.
- Developed and integrated a private, secure communication solution compatible with Cisco Jabber; contributed to technical documentation and defect tracking.

Web & Application Developer - Apprenticeship | CRM, Web & Automation | Fiscalyse - Marseille, France | Sep 2022 - Sep 2023

- Gathered user needs and enhanced internal applications and an open-source CRM to improve operational processes.
- Developed web platforms with PHP, Symfony and JavaScript, including SQL/MySQL database integration and management.
- Built automation scripts and CRM tools to reduce repetitive manual tasks.
- Extracted, checked, corrected and updated data with SQL; produced operational reporting using Excel, SQL and internal tools.
- Used Docker, Kubernetes and Git for application environments and contributed to application testing and quality.
- Mentored interns, providing technical guidance and follow-up on assigned work.

Earlier experience: Web Development - Fiscalyse (internship, Mar-Jun 2021)

Accounting & Management Assistant - Conseil Departemental 13 (Jul-Oct 2020)
